

# DREXEL®

## "ONE TRUCK DOES IT ALL"

### WHAT IS A DREXEL SWINGMAST® LIFT TRUCK?

By our definition, it is a multi-purpose lift truck capable of working as:

- 1) VNA (Very Narrow Aisle) truck, working aisles as small as 54"
- 2) Regular forklift, unloading trailers, working in bulk storage, storage racks, working in conventional warehouse operations.
- 3) Long load handler, moving long loads through standard doorways

As important as to you understanding what a Drexel Swingmast® is, we want you to understand what the Drexel Swingmast® is not . . . . .

**The Drexel is not a turret truck.**

A **turret** truck is a single purpose truck and is only capable of working as a very narrow aisle machine in a highly controlled system.

COMPARE THE TRUCKS:	DREXEL	TURRET
Forks Turn 180°	No	Yes
Works Unguided	Yes	No
Works on Standard Floors	Yes	No
Works with Different Size Loads	Yes	No
Works Dock or Trailers to Rack	Yes	No
Works Indoor & Outdoor	Yes	No
Works as a Long Load Handler	Yes	No

In fact, the only thing the Swingmast® cannot do is to turn the forks 180°. Look at the turrets "can't do" list and ask yourself-

**Which Truck Makes More Sense ?**
